FONDÉES PAR ANGELO MOSSO
ET CONTINUÉES PAR VITTORIO ADUCCO

PUBLIÉES PAR GIUSEPPE MORUZZI
Professeur de Physiologie à l'Université de Pise

TOME 104
1966

PISA
UNIVERSITÀ DEGLI STUDI
1966

Rédaction: *Via S. Zeno, 31 – Pisa (Italie).*

Administration: « *Archives italiennes de Biologie* » – *Università – Lungarno A. Pacinotti, 43 – Pisa (Italie).*

Imprimerie: « *E. Ariani* » *e* « *L'Arte della Stampa* » – *Firenze (Italie).*

TABLES DES MATIÈRES

FASCICULE 1, MARS 1966

1. Étude électrophysiologique d'un transfert interhémisphérique callosal. F. Bremer . . . . . Pag. 1

2. Influence of the geniculo-cortical system on visual responses of the superior colliculus. D. Jassik-Gerschenfeld, P. Ascher and J. A. Guevara 30

3. Activations directe et réflexe des projections cortico-cérébelleuses issues du cortex moteur et du cortex orbitaire. C. Batini, G. Castellanos et P. Buser 50

4. Primary afferent depolarization evoked from the brain stem and the cerebellum. D. Carpenter, I. Engberg and A. Lundberg 73

5. Inhibition of transmission to primary afferents by electrical stimulation of the brain stem. A. Lundberg and L. Vyklický 86

6. Sites of termination of interstitiospinal fibers in the cat. An experimental study with silver impregnation methods. R. Nyberg-Hansen 98

7. Monosynaptic and polysynaptic spinal reflexes during physiological sleep and wakefulness. F. Baldissera, G. Broggi and M. Mancia 112

G. Levi (1872-1965) 134

Analyses 139

FASCICULE 2, JUIN 1966

1. Scopolamine induced changes of brain acetylcholine and EGG pattern in cats with complete pontine transection. G. Deffenu, P. Mantegazzini and G. Pepeu . . . . . Pag. 141

2. Cortical d. c. potential changes associated with spontaneous sleep in cat. K. Tabushi, Y. Hishikawa, M. Ueyama and Z. Kaneko . . . . . Pag. 152

3. Effets de la potentiation posttétanique sur la transmission synaptique dans les voies visuelles centrales. M. Meulders, J. Bergmans et J. Colle 163

4. Impulse activity in the crayfish stretch receptor neuron. Y. Washizu and C. A. Terzuolo 181

5. Fibres fusimotrices statiques et fibres fusimotrices dynamiques, chez le lapin. F. Emonet-Dénand, Y. Laporte et B. Pagès 195

6. Vestibular influences during sleep. – II. Effects of vestibular lesions on the pyramidal discharge during desynchronized sleep. A. R. Morrison and O. Pompeiano 214

7. Vestibular influences during sleep. – III. Dissociation of the tonic and phasic inhibition of spinal reflexes during desynchronized sleep following vestibular lesions. O. Pompeiano and A. R. Morrison 231

8. Responses of visual cortex to transcallosal and geniculate stimulations during sleep and wakefulness. F. Baldissera, M. G. Cesa-Bianchi and M. Mancia 247

9. Modifications de l'activité réticulaire consécutive à l'interruption de différentes voies de conduction spinales. L. D'Anna et M. Bonvallet 263

10. Réponses réticulaire immédiates, réponses réticulaires tardives et oscillations spontanées du tonus réticulaire. M. Bonvallet et L. D'Anna 280

Analyses 307

FASCICULE 3, OCTOBRE 1966

1. Supraspinal inhibition of toracic reflexes of somatic and visceral origin. A. M. Alderson and C. B. B. Downman. Pag. 309

2. Spinal motorneurons, interneurons and Renshaw cells. A Golgi study. M. E. Scheibel and A. B. Scheibel 328

3. Properties of interneurons in the ventral spinal cord. W. D. Willis and J. C. Willis 354

4. Time course of mammalian intrafusal muscle contraction as revealed by cinephotography of isolated lumbrical muscle spindles of the dog. K. Diete-Spiff . . . . . Pag. 387

5. Electrophysiological study of tectal responses to optic nerve volley. P. L. Marchiafava and G. C. Pepeu 406

Analyses 421

FASCICULE 4, DÉCEMBRE 1966

1. Vestibular influences during sleep. - IV. Functional relations between vestibular nuclei and lateral geniculate nucleus during desynchronized sleep. A. R. Morrison and O. Pompeiano . . . . . Pag. 425

2. Enhanced excitability of intra-geniculate optic tract endings produced by vestibular volleys. P. L. Marchiafava and O. Pompeiano 459

3. Étude macro- et microphysiologique des projections sensorielles somatiques au niveau du corps genouillé latéral du chat anesthesié au chloralose. M. Meulders, N. Boisacq-Schepens, J. M. Godfraind et J. Colle 480

4. A further note on the time course of cortical facilitation after photic stimulation. A. Cavaggioni, M. H. Goldstein jr. and D. H. Friedman 503

5. Effect of electrical stimulation of the optic nerve on retinal potentials. A. Gliozzi 511

6. Sleep in the pigeon. V. Tradardi 516

Analyses 522
